Subject: Contract [redacted] (657)-12846, Follow-On EMR Procurement
Disposition of Residual Inventories Thereunder

Attention: [redacted]

Dear [redacted]

In connection with the writer's current objective of accomplishing administrative close out of Contract [redacted] (657)-12846 (FH-7322) enclosed please find listings for the various items (primarily components) that are being declared as residual inventory.

25X1

Please be advised as follows:

- A. The inventory has been sub-divided into the following four (4) major areas:
 1. Items required in the fabrication of Prime Equipment and Special Purpose Test Equipment (SPTE).
 2. Spares for manufacturing support and operational (PSO) requirements.
 3. Special tooling.
 4. Miscellaneous.
- B. The writer understands that it is the PSO's intent to transfer the inventory in total to the Senior Crown Program (ASPO) under one of the current Support Contracts. The writer concurs in this approach in that it offers the possibility of realizing cost savings under future procurement(s) (i. e. ECPs, Work Orders, Spares Requirements, Additional Prime Equipment Requirements) through utilization of the inventory.

Insofar as the particular Contract to which the inventory would be assigned the writer suggests that it be the current FY 71 S & S Program.

In the event additional information is required please contact the undersigned.

Regards,

STATINTL
